Seeds that grow.

READ THIS.

IMPORTANT TO WHOEVER RECEIVES OUR CATALOGUE.

ANNOUNCEMENT. Our catalogue contains about all the best varieties of vegetable and other seeds generally used. We save hundreds of dollars by conforming our stocks of seeds to this truth, as it saves the enormous expense of a large catalogue that gives no greater benefit, but confuses the customer in his selection of seeds on account of the great number of names, in many cases representing one single variety of seed. The above is written from long study and experience. The purchaser has to pay for large expensive catalogues in the prices of seeds quoted in such issues. We are using the common sense plan. We cata-

logue only the best varieties, under their original names; thus we reduce greatly our catalogue expense and give that benefit to our customers in low prices. Showy pictures do not improve the quality of seeds, neither do they make them produce better. These are plain facts for practical thinkers. Our prices and the quality of our seeds will convince our customers of the truth. Let us hear from you with liberal orders as a proof of good judgment. We will profit by your trade, you will profit with our seeds.

Respectfully,
L. E. ARCHIAS SEED CO.

Vegetable Seeds

Of Special Merit. New and Choice.

Archias' New Crimson Beauty.

A mammoth tomato of striking smoothness and beauty, color a rich glossy crimson; it is the largest cropper of any crimson variety known, and is very early for so large a tomato; it ripens fully as early as New Stone; flesh unusually firm, almost solid; 12 large fruits are sometimes borne in one single cluster, making a most strikingly beautiful sight; in flavor it has no equal; free growth and easy culture; does not rot nor crack; ripens full up to stem; keeps long; does best on trellis or tall stakes. Don't fail to add this tomato to your seed order. Price, pkt., 10c; 3 pkts., 25c; ½ oz., 50c; oz., 35c; ¼ lb., \$1.25.

NEW SUNPROOF CABBAGE.

Certainly the best, most hardy, heat-resisting second early cabbage of all recent new and valuable introductions; very near as early as the Early Jersey Wakefield, producing heads sometimes reaching the enormous weight of 14 to 20 pounds; heads rather flat and very compact; cooks unusually tender and sweet; excellent flavor. Heads of this new cabbage when ready for use have but few loose outside leaves. Just the thing the family and market gardener have been looking for. Price, liberal pkt., 10c; oz., 35c; ¼ lb., \$1.00, postpaid. Don't fail to add this to your order.

Monte Cristo or Kleckley Sweet Watermelon

Where sweetness combined with large size is desired this variety will surely please, as it not only produces melons above the medium size, but has that crisp, sugary flavor so much desired in a watermelon. The vines are of vigorous growth, and produce a large crop of melons, which are of good size, oval shape, skin dark green and somewhat mottled. The rind is thin, thus making it undesirable as a variety to ship long distances, but sufficiently tough to stand carrying to nearby markets. The heart is large and solid and flavor all that could be desired. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

New Crimson Globe Beet

This Beet is remarkable for its smooth skin and fine shape. We have been growing it on our trial grounds for several years, and could not help noting its many desirable qualities. It is a second early variety, does not grow large and coarse, the matured beets being medium in size and rather oblong in shape. The flesh and skin are both very dark and quality fine, being sweet and tender. The tops are small and dark in color. We are confident that this beet will please all who plant it. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

New First Prize Cucumber

A famous new Cucumber of the long green type, the most handsome cucumber grown, produces enormous crops, vine of vigorous habit, cucumbers are from 9 to 12 inches long and attractive in appearance, sells better than any other variety on market on account of its excellent quality for slicing and its unsurpassed beauty. It is crisp and firm, remains in bearing long after other varieties have gone. Our "First Prize" has won the admiration of all who have seen it. It is of the straight type. Pkt., 10c; oz., 15c; ¼ lb., 35c.

WE OFFER one liberal package of each of the ten splendid varieties on this page, postpaid to any address, for 50c; or customer's choice of any five varieties on this page for 30c, postpaid.

New Mastodin Lettuce.

Most wonderful type of Lettuce ever introduced, in its enormous size, quality, productiveness and general appearance. It forms solid, white heads, sometimes reaching the enormous weight of three to five pounds; exceedingly tender, crisp and sweet; beyond any doubt the most valuable addition to the Lettuce family ever introduced. All should have a packet of this new wonderful lettuce. Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 60c; postpaid. Mastodin Lettuce made a big hit last year. Don't fail to try it.

Queen of the Garden Lettuce.

If you want an early, crisp, sweet, tender lettuce, this splendid variety will more than delight you. It is the first lettuce in spring and remains a long time in its tender, sweet condition; it withstands hot sun; light green colors; grows rather tall; somewhat resembles the Simpson varieties, but very much superior. Pkt., 10c; oz., 15c; ¼ lb., 50c.

New May Queen Pea.

The seed sprout quickly, and make the most remarkably rapid growth, maturing peas ready for the table in 38 days after germination. Very productive, easy to pick, pods good size. Peas of exceedingly fine flavor, tender and sweet; height 20 inches; does well with or without sticking. We know of no half-long radish that will equal this new variety. Pkt., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

New Scarlet Globe Radish

Those who like the crisp little red Radishes that come so early will be pleased with this variety. The Radishes grow globular in shape, and are of a most brilliant scarlet color. It will stand considerable heat; it is a quick grower, and the quality is fine, being crisp and tender. It is by far the best variety of recent introduction. It is an extremely valuable and desirable sort for planting in the home garden and for market gardeners' use. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00.

SUGAR AND STOCK BEETS FOR STOCK FEEDERS

Farmers

Read This.

STOCK BEETS are fast coming to the front in the southwest as a safe and economical food for cattle, sheep and hogs, and for horses. If farmers would feed more Stock Beets and less corn and other grain, their stock would be healthier and their profits far greater. Since 15 to 20 tons of Beets can be grown to the acre, in site of drouths. The Beets are rich in fatty matter and all that is required to keep them is to hole them up in the field like Turnips. Stock Beets are a healthy food and but little grain need be fed with them.

More feed can be raised on one acre of Stock Beets than on 5 to 7 acres of corn and no more labor is required than on corn. Send us 30 cents and receive Gregory's Book on Beet, Carrot and Turnip Culture, postpaid.

Alfalfa or Lucerne Clover.

We wish we could impress on our Southern farmers the great value of this wonderful Clover. It grows during dry weather better than any other crop, on account of its deep rooting quality. Have the land well prepared and sow from 15 to 20 lbs. per acre. We would advise cutting once the first season. The second season it can be cut three or four times. It lasts from eight to ten years and longer. Thrives best on a soil well drained, deep and rich, although it seems to be thriving well on almost all kinds of soil. The sun must have free access to Alfalfa, and the ground should be rolling to enable the water to pass off readily, for a wet subsoil is fatal to the plant. Sow in February or March. Seeds weigh 60 pounds per bushel. We make a specialty of choice Alfalfa Seed. Price, postage paid, lb., 25c; by express or freight, lb., 15c; pk., \$2.10; bu., \$8.00. Sacks free.

KAFFIR CORN

Has come to stay as a forage plant. It is a sure crop, grown for its grain. It yields more than corn and will succeed where corn fails. Can be used for every purpose that corn is valued. All stock is fond of it and thrive on it. It has no equal as a poultry food; a wonderful and cheap egg producer. The white variety is the most productive. Kaffir Corn is absolutely drought proof.

During a recent trip through the arid and semi-arid parts of the West clear into Old Mexico, by our Mr. L. E. Archias, he made particular inquiries into the uses and growth of Kaffir Corn. He found it their staple article for stock and poultry food, and in many cases it is used by the people as food. He found stock and poultry in a splendid, thriving condition, and their only grain food was Kaffir Corn.

SEED FLAX.

DWARF ESSEX RAPE.**DWARF ESSEX RAPE OF THE TRUE BIENNIAL VARIETY** is considered indispensable by the sheep and cattle farmers of Great Britain, and is fast coming into use in this country on account of its rapid growth, being ready to feed in ten weeks from sowing, and producing 25 to 30 tons of green forage to the acre. It grows to a height of 3 feet and covers the surface so densely as to smother out all weeds and to kill quack and other objectionable grasses. It can be sown all through the season, being perfectly hardy; withstands drought and will produce a crop in any soil by sowing broadcast at the rate of five pounds to the acre, or in drills or rows two feet apart, at the rate of 3 pounds per acre. Sow in March or April at the rate of 3 lbs. per acre in drills 4 feet apart. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 80c, postpaid.
